Amplified bible new testament pdf download software download full

I installed this app for one reason: because it has an option to hear the Amplified Bible read for you. However I found that although many choices of different male and female voices with either British or American accents can be selected, irrefutably, and distractingly not a single one of them even is a real person – they are all of an archaic artificial computer generated type that because of that fact unavoidably grates on my nerves, and is very, very disruptive making the capability completely useless to me. Apple’s SIRI in comparison is far more real sounding than any one of those artificial ones you have on here to chose from. Please take the time, and resources to create audio of even just one living, breathing American male, and/or one living, breathing American female even to choose from instead of all those nerve grating primitive artificial voices. To me they all have the same highly distractive “fingers being scraped down a chalkboard effect on my nerves, and I’m sure I’m not alone in that regard!
